Abstract—This Research about Intention to use internet marketing in Indonesia intends to figure out how big Indonesians’ intention in using internet marketing. As we know, internet marketing can be one solution for companies which have limited budget in running their operations. The rapid advance of technology and the increase of start-up amount in Indonesia these past few years generate some new problems. The basic problem of these start-ups is capital limit, which results that many start-ups can only last for 1 year. With the programme of Indonesian government who support the start-ups’ owners to go online and advertise their products or services in internet it’s highly expected that they can tackle their problem in such capital limit. This research has taken as many samples as 220 owners of micro, small, and moderate businesses as well as online business owners utilising internet as media to advertise their products or services. This research is a survey-based by using google form as a media which uses analysis technic of SEM with AMOS 22. The result of this research confirms that Performance Expectancy and Facilitating Condition are variables that influence the intention of Indonesians to use internet marketing. While gender moderates the influence of social influence toward the intention of Indonesian to use internet marketing. (Abstract)

Abstract—Indomie is the largest instant noodle manufacturer in Indonesia and worldwide, such as Africa, New Zealand, Southeast Asia, Australia, United States, and European countries. Since its first launching in 1972, Indomie rapidly grow and transformed from scratch, and now are being consumed by households, becoming the first choice to substitute rice as staple food across the nation. Indomie, the most innovative instant noodle brand, has satisfy the needs of the consumers by consistently developing new variants and flavors with authentic universal taste, integrated distribution channels, and affordable price. Indomie undeniably faced intense business competition in the market which led to dwindling sales in 2003. As a result, Indomie decided to maintain its strategic plans on pricing and product innovation. Apparently, Indomie learned that one of the biggest mistake may come from underestimating the capacity and strategy of its competitors. Therefore, Indomie constantly strives to analyze and monitor the market. The success of Indomie is a combination of long journey and hard work to maintain its irresistibly delicious taste as the family favorite and must-have instant food for its loyal customers. Indomie strives to be the major contributor to the well-being and satisfaction to its consumers and become a brand ritual. Indomie has transformed its loyal customers into product ambassadors by providing them opportunities to demonstrate its unique recipe. Due to its consistent marvelous Integrated Marketing Communication (IMC) methods, consumers continue to choose Indomie over other brands, winning 72 percents market share. With an annual production capacity of 18 billion packs of noodles that spread across 17 factories in Indonesia and more production in several countries, Indomie is ready to appetize the future.

Abstract—The practice of used goods sales and purchase in Indonesia has now penetrated the electronic market. In Indonesia, the e-commerce firms accommodating the used goods sales and purchase transactions is increasing in number. Participation in the purchase of used goods has also involved the middle-upper class society. Whereas, considering the high purchase power and the availability of various financial instruments such as credit card and instalment, used goods buying should not necessarily happen. This research discusses the attitude and behaviour towards the online purchase of used durable goods. The factors being measured include perceived enjoyment, economic benefit, ecological sustainability, self-denial in the purchase of goods and the risk in purchasing through internet, which affect the attitude and behaviour towards the online purchase of used durable goods.
